Jakarta & Bandung, Indonesia

SUMMARY

Muhammad Irham Rizq was born in Martapura, Kalimantan 30 July 2004 and a dedicated and hardworking undergraduated student with a passion for acquiring intermediate knowledge and skills in Web Developer, Application Developer, UI/UX and Event coordinator with excellent communication skills and strong interpersonal skills, Irham excels in a collaborative environment, where he is easily adaptable to changes in every situation, Irham demonstrates persistence in achieving desired results with solid analytical skills and a strong problem-solving mindset and always believes that his presence will definitely add positive energy to everyone and make the surrounding environment more cooperative.

EDUCATION

Bina Nusantara University | Computer Science

Aug 2023 - 2027

Interest in : Web Developer, App Developer, UI/UX, Design

- Learn Basic HTML,Css and few JavaScript, C, Python, MySQL, Java, Kotlin, Nest JS, Next JS.
- An Active Student in Campus Activity Units HIMTI (Himpunan Mahasiswa Teknik Informatika) and being Vice Chairman in BINUSIAN GAMING.

EXPERIENCE

Google Developer Groups Bandung (Lead total 1000 Participate)

February 2025 - Present

- Core Team of GDG Bandung 2025
- Event Division 2025
- PIC of Event GDG BANDUNG Build With AI 2025

Google Developer Groups on Campus Bina Nusantara University (Lead total 500 participate)

Oktober 2024 - Present

- Core Team of GDGoC Bina Nusantara University 2024-2025
- Non Technical Division 2024-2025
- Formalistic Staff 2024-2025
- PIC EVENT BINUS BANDUNG Road to APAC SOLUTION 2025
- UI/UX Workshop staff by GDGoC 2025
- Front-End Workshop staff by GDGoC 2025
- Back-End Workshop staff by GDGoC 2025
- Data Science Workshop staff by GDGoC 2025
- Machine Learning Workshop staff by GDGoC 2025
- Android Workshop staff by GDGoC 2025

Himpunan Mahasiswa Teknik Informatika Bina Nusantara University (Lead total 1500 Participate)

September 2023 - Present

- Active Activist since 1st Semester
- Web Developer Staff HIMTI 2025-2026
- Event Coordinator of TECHFEST Competition 2025
- Event Coordinator of TECHNO 2025
- Public Relation Staff HIMTI 2024-2025
- Event Coordinator of HIMTI Summer Class 2024-2025
- Part of HIMTI BINUS X HMIF Maranatha 2024 - 2025
- Workshop Technician IoT and LiveCode at BINUS INCUBATOR WORKSHOP
- Event Coordinator and Timekeeper of HIMTI Computer Class 2024-2025
- Sponsorship Division of TECHNO 2024
- Event Coordinator of Company Visit HIMTI 2024

- Vice Chairman of BINUSIAN GAMING BANDUNG
- Vice Chairman of Bina Nusantara Esport Championship 2025
- Public Relation Staff BINUSIAN GAMING 2024-2025
- Event Organizer of Bina Nusantara Esport Championship 2024
- Event Coordinator of EXPO STUDENT ACTIVITY UNITS 2024-2025
- Event Coordinator of BINUSAN GAMING Welcoming Party 2024-2025

Kuronashiro a Gaming Services Provider (Online Freelance)

2025 - Present

Providing consulting services regarding games and helping to solve these problems, one of which is by becoming an online game jockey.

- CEO of Kuronashiro Gaming Services Provider
- Worker of Kuronashiro Gaming Services Provider
- Available only for Genshin impact
- Has reached a turnover of almost IDR 10,000,000

Online Store Owner + Reseller (Personal Online Business)

2018 - Present

Selling various kinds of goods such as electronics, books, clothing, video games, Toys, household equipment and others in new to used condition and accepting assistance services to sell various kinds of goods.

- Kuronashiron Hobby on Tokopedia
- Kuronashiro Hobby on Facebook marketplace
- Kuronashiro Hobby on OLX
- Kuronashiro Hobby on Carousell
- Kuronashiro Hobby on Shopee
- Has achieved a turnover of more than IDR 100,000,000

TECHNICAL PROJECT

- **KURONASHIRO HOBBY WEBSITE (INTERNSHIP PROJECT)**
6th Semester Project Status : On Progress
 - Built a production-scale integrated sales operations (SalesOps) system using Next.js, NestJS, and PostgreSQL architecture. Implemented a Python-based artificial intelligence module (FastAPI) for automatic category classification using TF-IDF/SVM, as well as price anomaly and data duplication detection. Managed the application lifecycle through Docker containerization, GitHub Actions CI/CD pipelines, and real-time monitoring using Prometheus, Grafana and Nginx as a reverse proxy to ensure system stability and scalability This system integrates a real database of personal sales datasets (CSV/Excel format) which are processed through an automated parsing pipeline to extract price, rating and store performance data into a relational database schema.
- **LOST & FOUND WEB (WEB DEVELOPER COURSE)** : Campus Lost and Found Website build using Vue.js, Laravel, MySQL, Cloudinary, Vercel and REST API, Users can view a list of reported lost items and can submit a lost item with details and image that stored in cloudinary.
5th Semester Project Grade = 90 / A
- **AIR QUALITY MONITOR (IoT DEVELOP & ARCHITECT COURSE)** : Air Quality Monitoring System using MQ135 & PMS5003 Sensor and ESP8266 build using blynk as a controller and monitoring air quality in realtime.
5th Semester Project Grade = 80 / B+
- **TRAFFIC DETECTION (COMPUTER VISION IN IoT COURSE)** : A Traffic Detection program using Object detection method and build using YOLO11 for configuration hyperparameter and train data until getting maP value.
5th Semester Project Grade = 93 / A
- **LITTLE CARTS (MOBILE PROGRAMMING COURSE)** : Food Delivery Application Build using Kotlin Programming Language, Android studio ID, Firebase as Database and Figma as Design Prototype.
4th Semester Project Grade = 85 / A
- **FOUND IT (SOFTWARE ENGINEERING COURSE)** : Campus Lost & Found Application Build using Kotlin Programming Language, Android studio ID, Firebase as Database and Figma as Design Prototype.
4th Semester Project Grade = 87 / A

- **AR GARUDA (MULTIMEDIA MIX REALITY COURSE)** : Augmented Reality-based History education application using unity as the Engine, C# as Programming Language, Visual Studio Code IDE and Figma as the Design Prototype.
4th Semester Project Grade = 88 / A
- **AIR QUALITY PMS (EMBEDDED SYSTEM COURSE)**: Real-time air quality monitoring using PMS5003 sensor supported by ESP32,Arduino IDE, C++ as Programming language.and Firebase as Database.
4th Semester Project Grade = 100 / A+
- **SMART DOOR (CYBER SECURITY IN IoT COURSE)** : Smart Camera Door Lock using Wifi, ESP32CAM,Arduino IDE,C++ Programming Language and Telegram as a Database BOT Photo and Push Notifications.
4th Semester Project Grade = 100 / A+
- **AR AIR QUALITY (RESEARCH METHOD COURSE)** : RESEARCH PAPER “ *Augmented Reality for Air Quality Education : An Effective Interactive Approach* ” using IEEE format and submitted to Conference.
4th Semester Project Grade = 100 / A+
- **CHAT BOT(ARTIFICIAL INTELLIGENT COURSE)** : SIMPLE CHAT BOT AI using Python Programming Language and Visual Studio Code IDE.
3rd Semester Project Grade = 85 / A

ADDITIONAL INFORMATION

- **E-Certificate/Awards** : Introduction to Python by Sololearn 2024
Fundamental Front-End Web Development by Coding Studio 2024
Introduction to C Programming by Sololearn 2023
C Programming Course by Dicoding Academy 2023
- **Hard Skills** : Kotlin, Figma, HTML, CSS, JavaScript, C, C++, MySQL, Python, Java, Microsoft Office.
- **Soft Skills** : Team Leadership, Team Management, Project Management, Event Organizer, Teamwork, Creative, Public Speaking, Communication. Problem Solving, Analytical Thinking.
- **Languages** : **Indonesian** : Full professional proficiency
English : Limited working proficiency
